1. Expressões Regulares

digit = {0-9}

letter = {a-zA-Z}

variable = {letter}{char}*

1.1. Tipos de Dados

int = ("^-")?{digit}+

float = ("^-")?{digit}+{dot}{digit}+

char = "{letter}{digit}"

bool = "true"|"false"

string = char+

num = int | float

1.2. Comandos

attributionSign = "="

inputCommand = "input"

outputCommand = "print"

if = "if"

else = "else"

while = "while"

1.2. Operadores Relacionais

equal = "=="

greaterThan = ">"

greaterEqualThan = ">="

lessThan = "<"

lessEqualThan = "<="

different = "!="

1.3. Operadores Lógicos

and = "&&"

or = "||"

not = "!"

1.4. Operadores Aritméticos

sum = "+"

sub = "-"

mult = "*"

div = "/"

mod = "%"

1.5. Símbolos Especiais

begin = "{"

end = "}"

leftParentheses = "("

rightParentheses = ")"

dot = "."

1.6. Palavras Reservadas

type = "int"|"float"|"char"|"bool"|"string"|"num"

booleanValues = "true"|"false"

commandWords = "input"|"print"|"if"|"else"|"while"

2. Operações da linguagem

codeBlock = begin{operations}+end

operation = declaration | attribution | arithmetic | relational | logical | input | output | conditional |
repetition

declaration = type variable

attribution = variable attributionSign type

arithmetic = num(sum | sub | mult | div | mod)num

relational = num(equal | greaterThan | greaterEqualThan | lessThan | lessEqualThan | different)num

logical = not?(bool){(and | or)not?(bool)}*

input = inputCommand leftParentheses (char | int | float | bool | string) rightParentheses

output = outputCommand leftParentheses (char | int | float | bool | string)rightParentheses

conditional = if leftParentheses logical rightParentheses begin {operation}+ end {else begin {operation}* end}?

repetition = while leftParentheses logical rightParentheses begin {operation}* end

3. Tokens

Definição	Token
variable	VARIABLE
int	INT
float	FLOAT
num	NUM
char	CHAR
bool	BOOL
string	STRING
type	TYPE
codeBlock	CODE_BLOCK
operation	OPERATION
declaration	DECLARATION
attribution	ATTRIBUTION
arithmetic	ARITHMETIC

Definição	Token
relational	RELATIONAL
logical	LOGICAL
input	INPUT
output	PRINT
conditional	CONDITIONAL
repetition	REPETITION
